

Proposal to update GS1 classification section of LanguaL facet A

GS1 classification was added to facet A in the LanguaL thesaurus about 10 years ago, in order to allow users to include this international classification in their food description. However, it has recently been brought to our attention that GS1 has expanded its classification and changed some of its codes.

If it is decided to update GS1 classification in LanguaL facet A, then it would look like the following hierarchy. Descriptors given LanguaL code “Axxxx” represent new terms. Most of these represent individual food items identified at [plant or animal level](#). Documentation is missing in the December 2017 update of GS1, so information from the December 2016 version was used for proposed Scope Notes and Additional Information fields.

In a few cases, GS1 codes have been modified in the 2017 version, while the class name remains the same, so the previous LanguaL code can be retained:

- **A1016** 50112000 - MEAT/POULTRY/GAME/BATRACHIAN - PREPARED/PROCESSED (GS1 GPC) has become 50240100 - Meat/Poultry/Other Animals – Prepared/Processed
- **A1020** 50111500 - MEAT/POULTRY/GAME/BATRACHIAN - UNPREPARED/UNPROCESSED (GS1 GPC) has become 50240200 - Meat/Poultry/Other Animals – Unprepared/Unprocessed
- **A1015** 50110000 - MEAT/POULTRY/GAME/BATRACHIAN (GS1 GPC) has become 50240000 - Meat/Poultry/Other Animals

In one case, the GS1 code was reassigned to another descriptor, not very different from the previous, so the LanguaL code can also be retained:

- **A0987** 50100000 - FRUITS/VEGETABLES/NUTS/SEEDS (GS1 GPC) has become 50100000 - Fruits/Vegetables/Nuts/Seeds Prepared/Processed

Finally, 15 descriptors (listed at end of this document) are no longer present in the 2017 version of GS1. To insure backwards compatibility, it is not good practice to remove terms from a thesaurus. Therefore, these terms have been inserted into the new hierarchy with note that they are now deprecated (**terms in red**).
